THORNTON TOMASETTI RELEASES ‘HEALTHY REENTRY’ FREE SOFTWARE TO AID SAFE OFFICE RETURN

*Open Source App Provides Customizable Health Reporting
And Contact Tracing Capabilities*

New York, NY – November 5, 2020 – Thornton Tomasetti has open sourced its proprietary **Healthy Reentry** (HR) application for health monitoring and contact tracing. Designed to facilitate the safe return of employees to the workplace, the web-based solution can be customized to meet the needs of large and small companies while protecting the privacy of staff.

The image displays two screenshots of the Healthy Reentry application. The left screenshot shows the login page with the Thornton Tomasetti logo, a sign-in form, and a 'GET STARTED' button. The right screenshot shows the dashboard with a status indicator 'Last Updated on: Nov 4, 2020 as Green - No Signs or Symptoms' and buttons for 'Change Work Location', 'Report Your Health Status', 'Record a TT Encounter', and 'Display QR Code'.

Healthy Reentry enables employees to record their health status as it relates to COVID-19 before returning to a shared work environment. The simple, secure user interface is scalable for organizations of any size and is compliant with HIPAA, GDPR and other workplace privacy laws.

The HR app was developed by Thornton Tomasetti's [CORE studio](#) to speed the safe return of the firm's employees in more than 50 offices around the world. It has been in use by Thornton Tomasetti since June. The firm also shared the app with colleagues in the architecture, engineering and construction industries, and is now offering the solution to any firm that wants to use the codebase.

"We set out with the goal to create a tool that prioritizes the health and safety of our employees," said Thornton Tomasetti Chief Technology Officer Robert Otani. "As health monitoring and contact tracing will be the new normal as companies slowly move back to their offices, we decided to make this app available to everyone to help ease the process."

Here is how it works: Employees can report their health status through the app, which is accessible via smart phone or computer, and whether they are working from home or in the office. They will also receive regular reminders to update any changes to their health.

Once in the workplace, they can document "encounters," or incidents where person-to-person contact breaches a company's health and safety protocols. If the employees involved in these encounters remain healthy, the information is simply logged for future reference. However, if someone tests positive for COVID-19, HR app will alert a company's human resources department or management team, who then will be able to determine if any other employees have been exposed and act accordingly.

"In order to safely return to the office, each employee needs to meet local, state and company requirements," Otani said. "Through the Healthy Reentry app, we can ensure employees are operating in a safe environment while preserving their privacy."

Setting up the application for a firm's unique authentication and security requirements and branding does require software development skills. For additional information, contact CORE_HealthyReentry@ThorntonTomasetti.com

About Thornton Tomasetti

Thornton Tomasetti applies engineering and scientific principles to solve the world's challenges – starting with yours. An independent organization of creative thinkers and innovative doers collaborating from offices worldwide, our mission is to bring our clients' ideas to life and, in the process, lay the groundwork for a better, more resilient future.
