

Thornton Tomasetti's Forensics team welcomes Vice President Jeong K. Hong

(October 26, 2022) Jeong, or J.K. as he is more commonly known, has more than 25 years of experience in the management, investigation and evaluation of engineering research and development programs in the oil and gas, nuclear energy, shipbuilding, heavy machinery, and automotive industries. Based in the New York office, J.K. will be assisting clients with the performance of welded structures.

He holds bachelor's and master's degrees in mechanical engineering from Yonsei University and a Ph.D. in welding engineering from The Ohio State University. Most recently, he was a senior research engineer with Engineering Mechanics Corporation of Columbus. J.K. is a member of several professional organizations, including the American Welding Society, Korean Welding and Joining Society, American Council of the International Institute of Welding, and the Society of Automotive Engineers.
